Phylogenetic tree of the 12S rDNA region for various species. The tree shows relationships between species with bootstrap values at nodes. Species names are color-coded: blue for PLYN, orange for O-A, green for PLYS, red for W-H, purple for S-B, pink for HING, and yellow for SL. The tree is rooted with L12 and L56. The main branches are labeled with L13, L55, L14, and L54. The tree shows a clear separation between the PLYN group and the other groups. The PLYN group includes N. Reardon (L12) and D. Dwyer (L56). The O-A group includes D. Dwyer (L56) and D. Bourque (L13). The PLYS group includes D. Bourque (L13) and T. Donnelly (L136). The W-H group includes T. Donnelly (L136) and T. Donnelly (L136). The S-B group includes T. Medas (L14) and C. Riordan (L54). The HING group includes C. Riordan (L54) and B. Geraigery (L53). The MAR group includes L. Dillon (L137) and L. Dillon (L137). The tree also shows a large node labeled 213 at the base of the L136 branch.
